CGPA/SGPA to Equivalent Percentage conversion formula

If CGPA/SGPA is in [4.00, 6.00] then,  
Equivalent Percentage =  $10 \times \text{CGPA or SGPA}$

If CGPA/SGPA is in [6.00, 9.00] then,  
Equivalent Percentage =  $(05 \times \text{CGPA or SGPA}) + 30$

If CGPA/SGPA is in [9.00, 10.00] then,  
Equivalent Percentage =  $(25 \times \text{CGPA or SGPA}) - 150$

**Example:** 1. If CGPA = 5.96 then, Equivalent Percentage =  $(10 \times 5.96)$   
= 59.60%

2. If CGPA = 7.96 then, Equivalent Percentage =  $\{(5 \times 7.96) + 30\}$   
= 69.80%

3. If CGPA = 9.06 then, Equivalent Percentage =  $\{(25 \times 9.06) - 150\}$   
= 76.50%
